Example: Dual Kinect Pulmonary Function Testing

Double-sided chessboard setup

Example: Dual Kinect Pulmonary Function Testing

Double-sided chessboard setup

Example: Dual Kinect Pulmonary Function Testing

Double-sided chessboard setup

Recording a breathing test

Example: Dual Kinect 3D Reconstruction

Example: Animal Detection and Tracking

Chimpanzee and Great Ape Camera-Trap Dataset

Captured in the African jungle, provided by Max Planck Institute for Evolutionary Anthropology. There are 300,000 video clips – 15 seconds each – fully annotated with classes.

Example: Base Tracker

Example: Attention-based Occlusion-robust Tracker

Our Attention-based CNN

Without Attention
